## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 1 is objected to because of the following informalities: in line 5, the phrase "like a thumb shape" is not further limiting. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over the applicant's admitted prior art shown in figure 1 (AAPA, hereinafter) in view of Corisis et al. [US 6,462,273].

Regarding claim 1, The AAPA discloses a small memory card to be set in an electric device (figure 1), comprising a substrate (10) having a placed region (14), a first terminal and a second terminal (figure 1) which placed on both side, at least one IC package mounted thereon the substrate, the first terminal is formed with a plurality of golden fingers (20) so that the golden fingers can connect with the electric device when it is inserted therein the electric device.

The AAPA discloses the instant claimed invention except for a pull slot being formed on the second terminal of the substrate.

Art Unit: 2841

Corisis et al. disclose a memory card (figures 1a-d) having a first terminal and a second terminal which placed both side, wherein the memory card has an arc/thumb shaped pull slot (50, column 5, lines 35-38) being formed on the second terminal (figure 1a and 1d).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to include the pull slot design of Corisis et al. for the small memory card of the AAPA, for the purpose of enabling access the small by fingers.

Regarding claim 2, AAPA discloses the first terminal of the substrate being formed with a gap (figure 1).

### ***Response to Arguments***

4. Applicant's arguments filed 11-21-05 have been fully considered but they are not persuasive.

Applicant argues:

1]: neither Hsieh or Chen discloses a transparent layer on a memory chip and display the mark of memory chip; and

2]: there is not motivation to combine applicant's admitted prior art with to form the claimed invention.

Examiner disagrees:

Regarding 1: Applicant has not claimed, nor has examiner considered, a transparent layer on a memory chip and display the mark of memory chip.

Art Unit: 2841

Regarding 2: In response to applicant's argument that there is no suggestion to combine '864 (assumed by examiner to be '273) with applicant's admitted prior art, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Corisis et al. discloses the use of a arc shaped pull slot 50. A skilled artisan would have been motivated to use the pull slot of Corisis et al. with applicant's admitted prior art in order to facilitate removal of the card from its slot.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2841

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
